

2020 V International Conference on Information Technologies in Engineering Education

Inforino 2020

Table of Contents

SESSION 1. Industry 4.0, Cybersecurity and Engineering Education

| Authors, Title | Session#_SeqOrder# |
|---|--------------------|
| <i>A. Artemov, A. Ulanova, Y. Prudnikova</i> Practically-Oriented Approach to Training at the National Research University "Moscow Power Engineering Institute" in the Conditions of "Industry 4.0" and Its Problems | 1_1 |
| <i>T. I. Buldakova, A.V. Sokolova</i> Structuring Information about the State of the Cyber-Physical System Operator | 1_2 |
| <i>Almaz S. Duishembiev, Turatbek B. Duishenaliev, Danil R. Talipov</i> Virtualization of the Behavior of Structures From Rubber-like and Metal Composites | 1_3 |
| <i>Nadezhda Eyrikh, Ruslan Bazhenov, Tatiana Gorbunova, Natalia Markova, Aijarkyn Zhunusakunova</i> The Advantages of Using Computer Algebra System Maple in Learning Differential Equation | 1_4 |
| <i>Anna Glebova, Inna Lukashenko</i> Features of Teaching Economic Disciplines to Students of Engineering Specialties | 1_5 |
| <i>Dmitry Golubev, Sergey Belousov, Dmitry Kovalev</i> Training Specialists for Creating Digital Power Equipment | 1_6 |
| <i>Svetlana Kuzmicheva, Sergey Zapechnikov, Marina Kiryakina</i> A Technique of Protocol Construction for Detecting Compromise of Secret Keys | 1_7 |
| <i>Vitaly Martynov, Svetlana Makarova, Alena Zaytseva</i> Problems and Methods for Forming Educational Results in the Implementation of Engineering Education in the Digital Economy | 1_8 |
| <i>Vitaly Martynov, Elena Filosova, Alena Zaytseva</i> Information Architecture to Support Technical Education Training for Industry 4.0 | 1_9 |
| <i>Sergey Mezin, Danila Dementev, Ekaterina Maximova</i> Development and Implementation of Regulators Based on Artificial Neural Networks in the Process of Training Specialists in Automated Control Systems | 1_10 |
| <i>Valeriy Ochkov, Konstantin Orlov, Julia Chudova</i> STEM in Engineering Education (KEYNOTE) | 1_11 |
| <i>Konstantin Orlov, Valeriy Ochkov, Sergey Gromov</i> Using "TBT Shell" Software for Online Testing in "Water Treatment" Education Course | 1_12 |

| | |
|--|------|
| <i>Ekaterina Pecherskaya, Dmitriy Artamonov, Maksim Safronov, Ekaterina Polosina, Irina Renzyaeva, Anastasia Shepeleva</i> Improving the Effectiveness of the Information Module for the Interaction between Universities and Employers | 1_13 |
| <i>Nidal El Sabayar Shevchenko, Larisa K. Ptitsyna, Mikhail P. Belov, Aleksey V. Ptitsyn</i> Formation of Individual Educational Trajectories in Preparing IT specialists | 1_14 |
| <i>Naeim Rezaeian, Galina Novikova</i> An Approach to Solve the Problem of Creating an Automatic Knowledge Control System Based on Text Analysis | 1_15 |
| <i>I. Rusakov, A. Rodin, M. Smirnova</i> Quality Engineering Education in the Context of Industry 4.0 | 1_16 |
| <i>Ernesto Pacheco-Velazquez, Jaime Palma-Mendoza, Dimido Dewar Valdelamar</i> Learning Skills Development Through the Usage of Simulators | 1_17 |

SESSION 2. Software and Information Support and Software for Engineering Education

| Authors, Title | Session#_SeqOrder# |
|--|--------------------|
| <i>R.V. Alekhin, P.R. Varshavskiy, A.V. Kozhevnikov, P.A. Butyrin, F.N. Shakirzianov, M.V. Karpunina</i> Development of a Knowledge Base on the Topics of Theoretical Electrical Engineering Using Software Tools for Analysis and Generation of Collections of WIKI Articles | 2_1 |
| <i>Anastasia A. Bakulina, Olga E. Kondrateva, Oleg A. Loktionov</i> Software Package Development to Improve Occupational Safety at Electric Power Industry Enterprises | 2_2 |
| <i>A.V. Bobryakov, S.P. Yanukovich, K.V. Zakharchenkov, V.V. Borisov</i> A Method for Managing Engineers Training Processes using Swarm Intelligence Algorithms | 2_3 |
| <i>Otto Derzhavin, Elena Sidorova, Egor Vishnyakov, Tatiana Kudrina</i> The Construction of Simplified Models of a Multi-Timescale System on the Basis of Processes Implementations | 2_4 |
| <i>A.A. Emelyanov, O. V. Bulygina, N.Z. Emelyanova, E.S. Yashin</i> Simulation and Fuzzy Logic in Import Substitution Risk Management of High-Tech Equipment | 2_5 |
| <i>Alexander Eremeev, Sergey Ivliev, Alexander Kozhukhov</i> Tool Environment for Creating Training Prototypes of Intelligent Decision Support Systems | 2_6 |
| <i>Alexander P. Eremeev, Ilia A. Poliushkin, Nikolai A. Paniavin</i> Software Environment for Studying Intelligent Anytime Heuristic Search Methods | 2_7 |
| <i>Natalya N. Filatova, Konstantin V. Sidorov, Natalya I. Bodrina, Mark E. Voronkov, Pavel S. Klyuev</i> On One Method for Monitoring and Assessing Trainee's Cognitive Activity | 2_8 |
| <i>Katalina Grigorova, Kamelia Shoylekova-Nikolova</i> The Benefits of Mining Techniques in Digital Transformation of Engineering Education | 2_9 |

| | |
|--|------|
| <i>Pavel B. Khorev, Maxim I. Zheltov</i> Assessing Information Risks When Using Web Applications Using Fuzzy Logic | 2_10 |
| <i>Andrey Chernetsov, Pavel Khorev</i> The Problem of Ensuring Cross-Border Personal Data Transfer and Methods for Its Solving (KEYNOTE) | 2_11 |
| <i>Ivan Komarov, Andrey Vegera, Ali Zein, Svetlana Borisova, Svetlana Blazhenova, Aleksander Gavrilov</i> Design of Tree-Like Database Structure for Solving Test Modeling Tasks of Energy Equipment Training | 2_12 |
| <i>Sergei Kovalev, Anna Kolodenkova, Evgenia Muntyan</i> Educational Data Mining: Current Problems and Solutions | 2_13 |
| <i>Irina Kozmina, Denis Lukyantsev, Olga Musorina</i> Computer Adaptive Testing as an Automated Control of Students' Level of Preparedness Taking into Account their Individual Characteristics | 2_14 |
| <i>S.S. Kurbatov, I.B. Fominykh, A.B. Vorobyev</i> Applied Aspects of the Integrated Problem Solving System with Natural Language Interface | 2_15 |
| <i>V.A. Kurylev, M.V. Raskatova, A.S. Anisimov, P.V. Shchegolev</i> On Approach to Training in Methods of Software Working Out | 2_16 |
| <i>Viktoria Latypova, Vitaly Martynov, Anatolii Turganov</i> Decision Support System in Online Training Process Management for Implementing Complex Open Ended Assignments in Engineering Education | 2_17 |
| <i>V.S. Malyshev, E.V. Fedorova, A.M. Borovkova, V.A. Startsev</i> Education of Labor Protection and Environmental Engineering Specialists Based on Neural Network Data Processing Technology | 2_18 |
| <i>Mihkel M. Maran, Nikolai A. Paniavin, Ilia A. Poliushkin</i> Alternative Approaches to Data Storing and Processing | 2_19 |
| <i>A.Mokhov, V. Tolcheev</i> Automated Construction and Analysis of Scientific and Educational Profiles of the University Department | 2_20 |
| <i>Alexander V. Rechinskiy, Liudmila V. Chernenkaya, Vladimir E. Mager</i> System for Quality Assurance of Study Programs in the Area of Engineering Education | 2_21 |
| <i>Galina V. Rybina, Elena S. Fontalina</i> Some Aspects of Individual Approach to Learning Based on Tutoring Integrated Expert Systems | 2_22 |
| <i>Vladimir Sabanin, Vladimir Nesterenko, Andrei Repin</i> Methodological Support for Discipline Modeling Simulation Methods | 2_23 |
| <i>Vladimir Sabanin, Vladimir Nesterenko, Andrei Repin</i> Software for Training Process Discipline Simulation Methods | 2_24 |
| <i>Vadim A. Shakhnov, Andrey A. Glushko, Elena V. Rezhikova, Lyudmila A. Zinchenko, Vladimir V. Terekhov, Vladimir V. Makarchuk</i> TCAD and Cognitive Visualization in Electronic Engineering Education | 2_25 |
| <i>S.O. Smerchinskaya, N.P. Yashina</i> Program System "Decision-making: Procedures on Graphs" | 2_26 |

| | |
|--|------|
| V. Spichak, S. Petrov Experience in Designing and Developing the Educational Game BlockSolver | 2_27 |
|--|------|

SESSION 3. IT in Engineering Calculations and Design of Industrial and Energy Facilities

| Authors, Title | Session#_SeqOrder# |
|---|--------------------|
| <i>Marina M. Alekseeva, Ivan I. Artyukhov, Vadim S. Alekseev</i> Engineering Calculation of Induction Crucible Furnace with MATLAB/Simulink | 3_1 |
| <i>Sergey Bogatenkov, Ruslan Bazhenov, Tatiana Gorbunova</i> Information-Measuring Systems Introduction: Engineering Education Information Support | 3_2 |
| <i>Chernenkii Andrei</i> Using of the Aerospace Modeling Simulator in the Educational Process | 3_3 |
| <i>Artem Chernukhin, Tatyana Savitskaya, Andrey Sverchkov, Alexander Egorov</i> Software Application for Research on the Organization of Cyclic Production of Multi-Assorted Products | 3_4 |
| <i>Natalia D. Chichirova, Yuri V. Abasev, Ilmira A. Zakirova</i> Digital technologies in the educational process of the Thermal Power Plant Department, Kazan State Power Engineering University | 3_5 |
| <i>Maksim Dli, Andrey Puchkov, Ekaterina Lobanova</i> Engineering Study for Influence of Deep Neural Network Architectures on Images Recognition Quality | 3_6 |
| <i>L. Dorosinsky, N. Vinogradova, A. Sosnovsky</i> The Study of Computer Simulation as a Method of Cognition in the Teaching of Technical and Natural Sciences | 3_7 |
| <i>A.A. Filimonova, A.G. Filimonov, N.D. Chichirova</i> Study of Methods and Skill Experience of Diagnostics of the Main Heating Network State Diagnostics Using a Robotized Diagnostic Complex | 3_8 |
| <i>Yulia Geller, Yulia Shatskikh</i> Analysis of Free Software for Thermal Calculations | 3_9 |
| <i>George Grechin, Denis Shilin, Aleksandra Zayceva</i> Development of an Algorithm for Searching the Optimal Trajectory of the Object in the Conditions of Given Restrictions | 3_10 |
| <i>Victor Izhutkin, Alexander Zonov, Mikhail Zubov</i> Computer Model of the Reliability of the Communication between Nodes of a Wireless Sensor Network | 3_11 |
| <i>Dmitry Khokhlov, Mikhail Zaichenko, Kirill Sterkhov, Konstantin Pleshakov</i> Computational Model for High-Pressurized Heat Recovery Steam Generator Heat Transfer Study | 3_12 |
| <i>V. F. Kuzishchin, E .I. Merzlikina, V. S. Drobilko</i> Comparison of Different Variants of Regulators with Constant Speed Actuators Working with Low-Inertia Plants | 3_13 |
| <i>Sergey Kosarev, Andrey Gusev, Yuri Gusev, Dmitry Dobrokhotov, Ksenia Kolesnikova, Anna Peremyshcheva</i> The Use of National and International Standards in Developing CAD Models of Electrical Substations | 3_14 |

| | |
|--|------|
| <i>V. A. Loginov, A. A. Khvostov</i> Application of the Finite Element Method for Expanding the Capabilities of Educational Programs for Non-Destructive Testing of Industrial Facilities | 3_15 |
| <i>Alexandr Lubchenko, Dmitry Ivanov, Denis Lukiantsev</i> Application of MatLab for Processing X-ray Photoelectron Spectroscopy Spectra | 3_16 |
| <i>Boris Margolis, Gubran Mansoor</i> Engineering Calculations of the Glass Annealing Process | 3_17 |
| <i>Rodion Maslov, Konstantin Pleshakov, Kirill Sterkhov, Dmitry Khokhlov</i> The Calculation and Study of Pipe Operation of Low-Pressure Circuit of Heat Recovery Steam Generators | 3_18 |
| <i>E.I. Merzlikina, O.G. Prochyna</i> Laboratory Works on Control Theory Using Scilab/Xcos | 3_19 |
| <i>Anton Misnik, Vadim Borisov, Sergei Prokopenko, Sergei Krutalevich</i> Automation Methodology for Complex Technical-Organizational Systems | 3_20 |
| <i>Evgeniy Mladzievskiy, Elena Ryzhkova</i> The Use of Building Information Modeling Technology in Designing | 3_21 |
| <i>Hector Rafael Morano Okuno, Guillermo Sandoval Benitez, Virgilio Vasquez Lopez, Luis Villagomez Guerrero, Emmanuel Garcia Moran, Jose de Jesus Solis Cordova</i> Introducing Virtual Reality in an Automated Manufacturing Systems Course - First approach | 3_22 |
| <i>A. Nikitin, A. Belko, I. Zeylikovich, N. Babarika, S. Danilova-Tretjak, E. Evseeva, K. Nikolaeva</i> Numerical Models of Heat Conductivity of Composite Systems | 3_23 |
| <i>Jiri Pech, Milan Novak</i> Use Arduino and Micro:bit as Teaching Platform for the Education Programming and Electronics on the STEM Basis | 3_24 |
| <i>Sergei Prokopenko, Anton Misnik, Alexander Bobryakov, Vadim Borisov</i> Approaches to the Implementation of Information-Analytical Processes in Complex Technical-Organizational Systems | 3_25 |
| <i>Vladimir P. Radin, Olga V. Novikova, Elena V. Poznyak, Victor P. Chirkov, Oleg A. Babin, Sergey F. Kuznetsov</i> Matlab Application to Calculate Natural Oscillations of Beam Systems | 3_26 |
| <i>Rawad Deeb, D. Sidenkov</i> Investigation of a Flow Characteristics for Drop-shaped Tubes Bundle using Ansys Package | 3_27 |
| <i>Ivan Shcherbatov, Ekaterina Maximova, Danila Dementev</i> Applying of Modeling Tools Pack SimInTech in the Engineering Personnel Preparation for the Energy Sector | 3_28 |
| <i>V. S. Volgin, A.F. Ginevsky</i> Temperature Field Modeling Technique of a Thermoelectric Generator, Taking in Account Parasitic Internal Sources | 3_29 |
| <i>Krzysztof Wesołowski</i> Problems and Challenges in Education in ICT at the Poznan University of Technology (KEYNOTE) | 3_30 |
| <i>Dmitry Yemelyanov, Victor Toporkov</i> Coordinated Resources Allocation Heuristics in Distributed Computing | 3_31 |

SESSION 4. IT in Educational, Research and Testing Laboratories

| Authors, Title | Session#_SeqOrder# |
|---|--------------------|
| D.I. Gataullin, R.R. Vildanov About Possibility of Application of the Automated Systems of the Account of Energy Resources in Training and Research Programs | 4_1 |
| S. Gerasimov, V. Glushnev, M. Panov Model of Piezoelectric Transducers for the Metrological Characteristics Study of Ultrasonic Measuring Instruments | 4_2 |
| D.S. Kalachev, S.V. Mezin Modernization of Siemens SPPA-T3000 Laboratory with the Use of Real-Time Container | 4_3 |
| O.M. Kapustina, A.I. Kobrin Research on Mobile Manipulators Singular Kinematics by Computer Algebra Systems | 4_4 |
| A. Kobzev, Y. Mishulin, A. Lekareva, O. Sidorova Software Implementation of the Neural Network Controller in Systems with Complementary Correction of the Control Action | 4_5 |
| G.S. Kuleshova, S.A. Yanchenko Online Identification of Transformer Internal Faults Based on the Parameters of the Operating Mode | 4_6 |
| A.B. Kuvaldin, M.A. Fedin, N.S. Nekrasova, A.O. Kuleshov, O.A. Polyakov, S.S. Kondrashov Development of Software for the Automated Calculation Performance Induction Heating Gradient Blanks | 4_7 |
| N. Leonov, Gvan Chun Cho, A. Poluektov Short-circuit Currents from Wind Turbine Generators Study in Laboratory Workshop | 4_8 |
| A.V. Lubenchenco, O.I. Lubenchenco, D.A. Ivanov, I.V. Ivanova, V.A. Iachuk, D.S. Lukiantsev Acceleration of Monte Carlo simulation of Electron Transport | 4_9 |
| V.A. Milyutin, A.A. Sukhikh, I.S. Antanenkova The Use of Computer Modeling to Emulate Laboratory Work on the Study of Thermodynamic Properties of Substances | 4_10 |
| S.K. Popov, V.D. Vaniushkin, A.A. Valineeva Mathematical and Physical Modeling Cooling Process for Solid Waste Tire Pyrolysis Products | 4_11 |
| M. Rudenkova A Methodology of Modeling The IEEE 802.11 Wireless LAN Using ns-3 | 4_12 |
| M. Rumyantsev, D. Shumilin Automated Complex for Researching High-speed Electric Turbomachines | 4_13 |

| | |
|--|------|
| V.Shchugorev, V. Khromatov, A. Shchugorev, L.Sapunova Innovative Technologies in the Estimation of Oscillation Frequencies of Composite Structures with the Use of Audio Recording Equipment in the Laboratory of Dynamics and Strength of Machines | 4_14 |
| A. Shvetcov, V. Gorbunov, S. Dianov, K. Kinyakin Intelligent Robotics in the Structure of the Direction "Information Systems and Technologies" | 4_15 |
| A.A. Stoliarov, V.I. Kiselev, E.V. Kuznetsov Virtual Laboratory of Electric Motor in the Discipline of "Electrical Engineering and Electronics" | 4_16 |
| V.B. Tupov Using the Data Scientist Experience in Training | 4_17 |

SESSION 5. Distant Technologies and Electronic Educational Resources in Engineering Education

| Authors, Title | Session#_SeqOrder# |
|---|--------------------|
| E.K. Arakelyan, V.A. Rubashkin, A.V. Andriushin, S.V. Mezin The Use of Modern Computer-Based Training-Simulator Complexes in the Educational Process | 5_1 |
| Alexander Frolov, Alexander Vinnikov, Sofia Polyakova Distant Modeling of NIZK Protocol for Public Keys Certification | 5_2 |
| Alexander Frolov, Alexander Vinnikov Modeling Cryptographic Protocols Using Computer Algebra Systems | 5_3 |
| Valery Ochkov, Ilya Babichev, Michael Kirsanov Graph Analysis for Thermal Networks | 5_4 |
| Oksana Ladosha Modern Media Technologies in Teaching German Language to STEM-Students | 5_5 |
| Natalia Lyz, Alexander Lyz, Irina Neshchadim, Vitaly Kompaniets Blended Learning and Self-Reflection as Tools for Developing IT-Students' Soft Skills | 5_6 |
| Dmitry Merenkov, Sergey Shirinskii, Vladislav Korkin, Marina Zhokhova, Sergey Osipkin, Pavel Dergachev E-Learning Resource for Electric Machine Design | 5_7 |
| Liubov Yazykova, Inna Muzyleva, Anzhelika Martynova Practical Aspects of Creating a Teacher's Information Space | 5_8 |
| I. V. Putilova, M. P. Zhokhova, M. V. Shurkov, A. O. Gorbunova Application of the Imformation and Communication Technologies in the Centre for Science and Education "ECOLOGY IN POWER ENGINEERING" | 5_9 |
| Tatyana Shindina, Nina Knyazeva, Natalya Usmanova, Nina Orlova E-Learning: Experience and New Challenges | 5_10 |
| Igor Andrianov, Alexey Sukonschikov, Anatoly Shvetsov, Svetlana Rzheutskaya, Anna Sergushicheva, Dmitry Kochkin The Architecture of Intelligent Agent-Based Educational System for Training Students in a Technical University | 5_11 |

| | |
|---|------|
| <i>Elena Dudysheva, Olga Solnyshkova</i> Mobile Technologies in Blended Learning of Engineering Students in Digital Measurements on Geodetic Equipment | 5_12 |
| <i>Anton Sutchenkov, Anton Tikhonov</i> Embedding Interactive Python Web Applications into Electronic Textbooks | 5_13 |
| <i>Andrey Sverchkov, Pavla Mikhaylova, Tatiyana Savitskaya, Dinara Il'murzayeva</i> Multimedia Academic Manual "Database Application Development" | 5_14 |
| <i>A.V. Trofimov, A.M. Polyakov, V.A. Trofimov</i> Interactive Educational Complex on the Basics of "Digital Substation" Technology | 5_15 |

SESSION 6. Computer Graphics and 3D Modeling in Engineering Education

| Authors, Title | Session#_SeqOrder# |
|---|--------------------|
| <i>Linda Margarita Medina Herrera, Diamandina Glaros, Marlen Aguilar Abalo</i> MATHPOL: Development of Mathematical Competencies in Engineering Students Using Project-Oriented Learning | 6_1 |
| <i>Andrey Ivashchenko, Tatyana Kondrat'eva, Oleg Polyakov</i> Forming of Curvilinear Structures Based on Polyhedrons by the Projectivographical Method | 6_2 |
| <i>Natalia V. Kaigorodtseva, Nadejda U. Simak, Roman S. Simak, Mikhail I. Mashkarin, Dilnoza A. Achilova, Dilarom F. Kuchkarova</i> Quality Control of Training in Engineering and Computer Graphics | 6_3 |
| <i>Elena P. Kasatkina, Vladimir A. Sukhoverhiy, Yevgeniy Y. Chakheev, Dmitriy Y. Ivannikov</i> Testing System for Graphic Disciplines | 6_4 |
| <i>Alexander L. Kheifetc</i> Chasles' Theorem as a 3D Analogue of Pascal's Theorem | 6_5 |
| <i>N.V. Ozerova, A.A. Zavyalova, I.V. Korolev, N.V. Zvonkova, A.V. Sidorenko</i> Using Visualization in the Educational Process in the Direction of Environmental Protection | 6_6 |
| <i>A.M. Peremyshcheva, D.N. Asainov, M.V. Burmeyster</i> Improving Laboratory Work on Switching Devices through the Use of 3D-Visualization of a Heavy-Duty Circuit Breaker Model | 6_7 |
| <i>Olga Pichkaleva, Irina Stolbova, Alevtina Shakhova</i> Actualization of Graphic Training on the Basis of Design Activity | 6_8 |
| <i>Andrey Taratorin, Ainur Mukhametov</i> Usage of 3D Modeling in Engineering Education on the Example of the Noise Silencers Development | 6_9 |
| <i>Andrey Zakharov, Yulia Zakharova</i> The Use of Computer Graphics in the Study of the Geometric Modeling Course | 6_10 |
| <i>N.V. Zhuk, L.V. Ermakova, E.P. Kasatkina, O.I. Isaeva, Y.Y. Chakheev</i> The Use of Digital Technologies in Teaching a Foreign Language | 6_11 |
